PROFESSIONAL SUMMARY

Senior full stack engineer with over 5 years of experience specializing in the Laravel, modern JS frameworks and cloud architecture. I am a creative problem solver who thinks outside the box to find unconventional, efficient solutions to complex technical challenges. My focus is always on writing clean, scalable code that addresses real world business needs and performs smoothly under pressure.

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, Python, Java

Frameworks: Laravel, Vue.js, Angular, Nuxt.js, Spring boot, Expo

Databases: MySQL, PostgreSQL, Mongo DB

DevOps & Cloud: AWS, Docker, CI/CD Pipelines, Git

Automation & Tools: UiPath (RPA Developer & Orchestrator Admin), Power Apps, SharePoint, Figma, VS Code, PHPStorm, Linux

---

PROFESSIONAL EXPERIENCE

Senior Software Engineer
Ceylon Soft Solutions (Pvt) Ltd – Sri Lanka
Jan 2024 – Present

- Designed and tuned core RESTful APIs using Laravel and CodeIgniter, focusing on clean architecture that handles high traffic securely.
- Built fast responsive frontends with Vue.js and Nuxt.js, ensuring smooth user interactions and a clean component structure.
- Fixed performance bottlenecks by rewriting complex SQL queries and optimizing database logic to speed up data retrieval.
- Automated the release process by setting up AWS infrastructure and CI/CD pipelines, ensuring 100% reliable, zero downtime remote deployments.
- Evaluated emerging technologies to drive innovation and improve development practices across projects.

Software Engineer
DirectPay Pvt Ltd – Sri Lanka
Sep 2022 – Dec 2023

- Led the development of a mobile bank management web application using Laravel, taking the project from initial requirements to a fully functioning, secure system.
- Modernized legacy codebases by refactoring old architecture and implementing modern Laravel features, which drastically cut down technical debt and boosted system performance.
- Deployed a Laravel application to AWS and established automated CI/CD pipelines for continuous, reliable delivery.

System Integration Engineer
Aitken Spence PLC – Sri Lanka
May 2021 – Sep 2022

- Built and maintained core internal web applications using PHP, Laravel, and Angular, focusing on automating and streamlining business workflows.
- RPA development and cloud administration for UiPath, handling Orchestrator environments, managing package deployments, and building REST API integrations to expand what the automations could do.
- Kept mission critical systems running smoothly, providing deep support for legacy PHP systems, SharePoint sites, and Power Apps to ensure high availability and minimal downtime.

EDUCATION

BIT (Hons) in Networking & Mobile Computing

Horizon Campus, Malabe, Sri Lanka | 2017–2021

- Graduated top of the class with the highest CGPA in the entire cohort.
- Named to the Dean's List (2019–2020) for outstanding academic performance.

CERTIFICATIONS

- **Generative AI with Python** - Packt | Mar 2026
- **Generative AI: Prompt Engineering Basics** - IBM | Mar 2026
- **Introduction to Generative AI** - Google Cloud | Feb 2026

KEY PROJECTS

Talent Match AI – Recruitment Intelligence Platform
Spring Boot, Vue, Python, spaCy, Transformers, PostgreSQL, LLAMA CPP, Mistral, Docker, Trae AI

- Built an AI-powered recruitment assistant that extracts resume data with 92% accuracy and uses semantic similarity to match the right candidates to job descriptions.
- Implemented predictive analytics to forecast candidate success by analysing role fit, tenure patterns, and career growth trajectories.
- Built a real time dashboard for HR teams showing match scores, skill gaps, and retention risk indicators.

Blaze Entertainment – Ticket Booking Platform
Laravel, PHP, Tailwind CSS, MySQL

- Led the full stack development of a SaaS ticketing platform, designing tailored workflows and dashboards for three distinct roles: customers, merchants, and admins.
- Built the responsive user interface using Tailwind CSS, integrating secure online bookings, real-time sales tracking, and instant e-ticket delivery.
- Cut page load times by 45% through database query optimization, and set up automated CI/CD pipelines to deploy the system smoothly to a shared hosting environment.

Mobile Wallet Admin Panel
Laravel, Livewire, Alpine.js, Tailwind CSS, PostgreSQL

- Built a secure, audit compliant admin dashboard with Microsoft OAuth login and role-based access control (RBAC).
- Implemented a triple authorization workflow for sensitive operations to enforce strict change governance.
- Delivered real time monitoring of transactions and system activity using Livewire + Alpine.js no page reloads required.

Bank Mobile App Admin Panel
Laravel, Livewire, Alpine.js, Tailwind CSS, PostgreSQL

- Integrated Active Directory for enterprise authentication and enforced RBAC across all admin functions.
- Developed live dashboards for transaction oversight, customer request handling and dynamic financial reporting.
- Streamlined user and permission management with audit ready operational controls.
